Innovative solutions:

- **SL-shape** - thanks to this cutting edge technology, the massaging arms reach down to the buttocks and thighs, which leads to a sensational experience
- **Zero Gravity** - revolutionary feature that arranges the body in the ideal position for massage. This NASA-style function relieves the muscles, facilitates the massage and ultimately enhances its effects and the feeling of relaxation

- **Calf kneading massage** - airbags knead our calves in a pleasant and gentle way, reducing unnecessary tension

... further additions that enrich the experience:

- **Heating** - thanks to IR heating in the backrest, the chair will easily massage tense muscles, at the same time providing very pleasant and cosy feeling of warmth
- **Roller massage** - rollers placed in the footrests will take care of your feet in a completely new and pleasant way providing a much more intense massage resulting in relaxation and lightness
- **Shoulder and forearm massage** - airbags surrounding your shoulders will provide relief by pulsating massage of your arms from fingertips to shoulder ends
